### NO FLOATING HEELS HERE!

The fit of a heel in a jazz shoe is crucial for several reasons, primarily related to comfort, performance, and injury prevention. A properly fitting heel provides support to the dancer's foot, helping to stabilize the ankle and provide a solid foundation for movements. Dancers need to have confidence in their footwear. If the heel fit is not right, it can affect the dancer's balance, precision, and overall performance.

# TAP

## SHOP BY LEVEL - BEGINNER

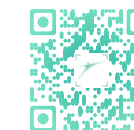

Choosing tap shoes by level is a great way to ensure that your dancers get the right style for their specific skill level and needs. Here's a general guideline for what to look for at different tap dance levels:

**Beginner Level:**

Choose basic tap shoes with a lower heel. Synthetic material can be more affordable. Synthetic soles are for dancers taking class 1-2 times per week, without toe-stands. Riveted on taps are a good choice.

## SHOP BY LEVEL - INTERMEDIATE

Choosing tap shoes by level is a great way to ensure that your dancers get the right style for their specific skill level and needs. Here's a general guideline for what to look for at different tap dance levels:

**Intermediate Level:**  
Higher-quality materials offer better sound and durability. Leather shoes with a slight heel and screwed-on taps are a good choice. Single and double-soled shoes are both good options depending on the skill of the dancer and the steps required. Dancers taking class multiple times per week and performing/competing are encouraged to upgrade.

**PRINCESS SEAMS - WHY THEY ARE A GOOD CHOICE**

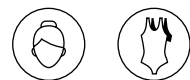

**Line lengthening:** Princess seams create vertical lines that run from the neckline or shoulder seam to the leg line. This can give the appearance of a longer and leaner silhouette.

**Shape Definition:** Princess seams follow the natural curves of the body, emphasizing the waist and bust while providing a more tailored fit.

**JUST A PINCH WILL DO IT**

Pinch details can be placed to improve the look, fit and comfort of a leotard. By gathering fabric at the bust line, a snug and comfortable fit is ensured, while allowing for freedom of movement.

**Simple gathered pinch:**  
Stable detail that works for all body shapes

**Adjustable pinch:**  
Elastic is sewn in two channels and can be pulled tight or left completely open at the discretion of the dancer. This is a great option for all body shapes and sizes as it is customizable.

**SOMETHING A LITTLE SPECIAL**

Beyond their functional role, gathers add visual interest and texture to the leotard. They can create a stylish and flattering look by accentuating the natural curves of the body and contribute to the overall aesthetics of the garment.

Placement is the key with these particular straps. Positioned at the center back, a bra can still be worn with this style while being concealed by the gathered straps.

**FABRIC MIX-MATCHING**

Whether a style has microfiber, mesh Spandex or lace, all materials have been carefully color matched to each other and provide the perfect amount of stretch. The stretch in a material is influenced by its composition, weave or knit structure, and the addition of elastic fibers. As pieces are designed, these factors are all taken into account as things are being cut meaning they can stretch to a similar degree when force is applied and return to their original shape afterward.

**CLEAN AND SMOOTH**

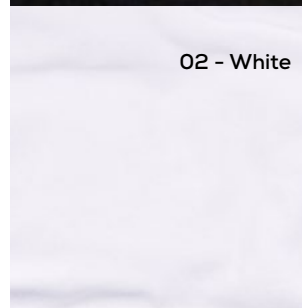

These modest, yet stylish designs prioritize comfort without sacrificing fit. By using the microfiber in a wider band around the arms and neckline, a smooth, polished look is achieved without having elastic digging into the skin.

Any lace that Só Dança uses is soft to the touch but durable, washable and flattering. Even after several washes, tiny elastic fibers will not show at the seams. Through careful construction, these fibers stay tucked away in the seam allowance keeping leotards looking new for longer.

**FINE FINISHING**

Corners, zippers and seam junctions - these are places that meticulous and well-executed details enhance the overall quality, appearance, and durability of a garment.

**Corners:** Fabric should lay flat so that the design shows through

**Zippers:** No puckering or lost zipper tabs as care is taken to properly secure the bottom and tops of the zippers

**Seam Junctions:** Properly handling intersections is crucial for achieving a clean and well-finished garment. This happens when four seams meet as different pattern pieces or panels come together

**NO SWEAT MARKS**

The appearance of sweat marks can be distracting and can affect the overall confidence of a dancer. Fabrics that conceal sweat help maintain a polished and professional look throughout any class or performance. While microfiber is designed to pull moisture away from the body, dry quickly, and provide the necessary stretch for the dancer's movements, lace and mesh spandex offer additional protection against moisture stains. Styles with cap or long sleeves made of these fabrics allow dancers the choice of style without having to worry about sweat marks.

**INSEAM AND SKIRT LENGTHS**

Inseams are measured from the center of the gusset, along the inside seam of the leg to the bottom of the hem.

Skirt lengths are measured at the center back of the skirt from the waistband to the hem

**What's a gusset?**

A gusset is a piece of fabric that is inserted into a seam or at a junction of fabric panels to add shape, strength, or extra space. Crotch gussets are important in dancewear as they give dancers improved fit and increased mobility with their legs.

# SHOE SIZE CHART

**Are they a 3, or are they a 5?  
Well, both. And here is why.**

Some child shoe sizes crossover into adult sizes. That is why there are "gaps" between the style sizes. For many Só Dança styles, sizes 1-3.5 or sizes 2-4.5 are "missing" so that you don't have duplicates in your inventory
